UI/UX Designer

 Job Description Candidates

Job Description

 Description

About Company

We craft digital products for business and user goals. Help find solutions with UI / UX designs that are intuitive and in accordance with client business goals. We provide a high-quality service in UI/ UX Design & Development. We craft digital products for businesses in achieving user goals by providing intuitive solutions. We have worked with a vast number clients who have different backgrounds such as construction, insurance, health, marketing, cryptocurrency, stocks, games, startup, real estate and many others.

What you'll do

Areas you could work on:

- Work as a User Interface Designer for our B2B SaaS product along with stakeholders
- Translate client briefs into a clear, user-friendly interface design and interactions. Develop both low and high-fidelity mockups.
- Testing out design assumptions and usability level of your design. Validate your design decisions through user feedback, iterate your designs based on this feedback, and meticulously document the process.
- Work closely with a team of project managers, client stakeholders, researchers, and content designers.
- Conduct user research and evaluate user feedback

Requirements:

- A mid level product designer with min. 3 years of experience.
- A designer with a strong UX and UI portfolio that demonstrates problem-solving skills, design methods, and craftsmanship.
- An organized designer that always documents their works, Figma files, and research reports.
- Comfortable with fast-paced work environments, context switching, and excited to drive the projects forwards.
- Able to explain your design process, outcome, and decisions that you've made.
